

JOB OPENING – EcoChem Analytics

Title: Continuous Emissions Monitoring System (CEMS) Engineering Technician

Location: Northeast, US.

Company Background: Ecochem Analytics is a premier manufacturer of Gas Analyzers and CEMS used to report stack emissions for EPA compliance. We are a very dedicated team with an incredible work ethic and are committed to serving our customers. We employ people who are self-motivated and who are willing to go the extra mile for their customers.

Job Description: We are looking for an Engineering Technician in the Northeast US to service our equipment. The job will require ~60% travel, mostly in the Northeast with occasional work in other locations. Below is a summary of the tasks:

1. Perform periodic maintenance on analytical systems at various power plants, chemical plants and energy-from-waste facilities.
2. Perform EPA required testing including Cylinder Gas Audits (CGA) and support for Relative Accuracy Audit Testing (RATA).
3. Interface with customers; provide training and documentation of service-related activities.
4. Maintain, repair, install and troubleshoot analytical systems.
5. Must abide by all Health, Safety and Environmental (HS&E) guidelines. Random and periodic drug and alcohol testing is required. Must be able to lift 50+ pounds. Must be able to work on elevated platforms. Must have a valid driver's license and be insurable by company insurance carrier.

Skills and Experience: The following skillset is desirable

1. Three years of continuous experience in a technical capacity (Associate's or Bachelor's in a technical discipline preferred).
2. Willing and able to travel as described above. Most work is during the week; however, there will be some weekend calls.
3. Ability to troubleshoot systems.
4. Electrical familiarity including the use of a voltmeter.
5. Strong computer skills are preferred including Word, Excel and PowerPoint.
6. PLC and logic capabilities are a plus.
